How Could You Share Device to Others?

MI ID A: Owner of device

- MI ID B: Who wants to have device from owner.
- 1. Make sure MI ID A and MI ID B select same region.

5. Device will appear on MI ID B' s list. But please notice the shared function is designed to just allow some basic features to be used by account shared. If MI ID B needs the whole features of device, we suggest he uses the owner's Mi account as one Mi account could be signed in on multiple phones.
