How do I connect my robot cleaner to Roborock app on an Android device?

1. Download the Roborock from Google Play.

2. Select your current region and register for a Roborock account by your phone number or email, and then log into the account.

	<	<
roborock	Please create your account	Welcome
(V300)	Region Mainland China (+86)	Region Mainland China (+86)
	Enter phone number X	Enter phone number X
	Enter code Get code	Enter password
	 I agree to Roborock's "User Agreement" and "Privacy Policy" 	Forgot password? SMS log in
	Next	Log in

3. Connect robot cleaner to Roborock app.

Notes:

- a. Make sure your phone is already connected to Wi-Fi;
- b. Open the top of your cleaner to see the Wi-Fiindicator light during the connection process.
- 3.1 If you are a new user or have no device online in the app, please tap the "search for device" icon to add a device.

3.2 If you already have one device online in the app, and want to add another device. Please press the "+" button to add device.

3.2.1 If you're using Q series including Q7max, Q5, and Q7, use your phone to scan the QRcode.

Here's where you can find the QRcode.

3.2.2 If you're using other models, please click "No QR code found".

3.3 Scan nearby devices.

The phone will detect nearby devices until the device pops up. Once it pops up, please tap the device icon.

3.3.1 If the device is not detected, please tap your model in the Vacuum list.
